Safe Home Solutions

In today's busy lifestyle where both parents are working couples, we can make sure that the parents have 'peace of mind' by watching their lovely children from their remote work-locations, as if the children are just in front of them live streamed through their mobiles. Solution for homes covering indoors and outdoors.

"When safety is first, you last." - Author Unknown

Software House

Falcon Technologies offers business specific, ready to deploy, end to end solutions which, although are extremely simple to use, function within the norms of the standard accounting principles and are audit compliant. Our solutions come with built-in internal controls, where the system follows the document process cycle from start to finish. This enables the management to secure, control and manage the business efficiently and effortlessly.

Our software solutions include ERP, CRM and Accounting software.

“Privacy - like eating and breathing - is one of life’s basic requirements.” - Katherine Neville

Access Control System

Physical Security and Access Control Systems have become necessary for most companies and offices. Large and small companies and offices need their facilities, data, and personnel. Falcon Technologies provides high security biometric and card based access control systems designed to protect access to secure areas or restricted zones in an enterprise. It is essential that before installing a system all considerations are taken into account and designed accordingly. Our technical team will inspect your premises and discuss your needs with you and recommend the ideal method of access control, as well as time attendance systems.

“Communication is the real work of leadership.” - Nitin Nohria

Nurse Call System

The technology driven nurse call systems has evolved into a world of digital and networked IP-based systems that have helped to improve patient care in hospitals. Nurse call systems are becoming more intuitive and easy to use, with specialized options designed to handle patient requests.

Nurse call systems continue to expand their capabilities beyond life safety provisions. Targeting improvement in patient satisfaction, staff communications and operational efficiencies, features that used to be considered optional are now standard.

“The most important thing in communication is hearing what isn’t said.” - Peter Drucker

Motorcycle Security

Introducing “Garuda Systems” India, the only GPS Motor-bike tracking/security system that s both the motorbike and the rider.

Garuda is the only system to offer two-in-one solutions: motorbike rider's safety and motorbike security.

Garuda is the first in the world to combine an anti-theft security / tracking system with fall and crash detection features using advanced GPS enabled technology. This technology allows Garuda to notify you if your motorbike is being moved, has an impact or has fallen over.

Designed specifically for today's motorbikes, Garuda is simply the best anti-theft and accident detection system in the world made exclusively for motorbikes. The unit is designed to fit all types of motorbikes.

Garuda has a 24x7 Call Centre which will receive alerts on all the unusual events such as an accident, theft or a kidnap, and will notify not only follow-up on the rider's well-being, we also inform the nearest police station and make paramedic arrangements if needed.
