Top Gas Cylinder Delivery Services In Dubai

Our Vision

To be the most trustworthy market leader in providing comprehensive gas solutions

Our Values

- ➔ We set and apply the highest standards of conduct and accountability
- ➔ We respect and value everyone and embrace diversity
- ➔ We aim to provide a safe, healthy and environmentally friendly workplace for our employees and business partners and to minimize any adverse effects of our operations on communities and the environment

SINCE 1986

Obaid Ahmed Gas Distributing L.L.C

Obaid Ahmed Gas Distributing LLC is one of the largest LPG cylinder distribution company in Dubai, **Established in 1986**, having an extensive distribution network across Dubai. Our company has earned its reputation for providing great value and high-quality products and services – which is why you can expect the expected, every time.

We are pioneers in gas distribution since 1986 and our services include supply & installation of LPG Gas Cylinders, Propane Gas cylinders, Bulk Gas Supply to Hotels, Restaurants, Labour Accommodations and related accessories for domestic & commercial use. We offer cylinders on contract/rental basis tailored as per client's needs.

Our Gas distribution force consists of about 30 Drivers, 5 Supervisors and 30 Sales man with a fleet of specifically designed vehicles as per Civil Defense of Dubai norms and regulations

to maintain our service as per customer satisfaction. Regular supplies are pre-scheduled to avoid the waiting time for customers, we ensure our customers are able to receive their orders within the shortest time span.

Obaid Gas company have well-trained staff (Civil Defense Certified) and our own vehicles to cover a wide network of door-to-door free delivery services throughout Dubai. We guarantee that all our cylinders will be filled in accordance with approved Civil Defense regulations and weights.

Apart from trade license and other legal documents, we also have government sanctioned ESMA certificate and Supreme Council of Energy Approved Letter. The Supreme Council of Energy Approval Letter is the latest permit issued by the officials for all the gas distributing companies in Dubai.

OUR SERVICES

5.5kg, 11kg, 22kg and 44kg

LPG (Cooking) Gas

Obaid Gas Company is the one of the leading authorized distributors of Emirates & Emarat gas in Dubai. All cylinders procured from them have undergone the highest safety tests as per ISO standards to avoid any potential hazards to our customers.

Providing sales delivery notes and invoices delivered to all our customers ensures uninterrupted and efficient delivery. We guarantee that all our cylinders will be filled in accordance with approved Civil Defense regulations and weights. Gas cooking cylinders come in varying sizes including **5.5kg, 11kg, 22kg and 44kg**. As per usage requirement, customer can choose a smaller or a larger cylinders.

We also offer goods on contract/rental basis, for further inquiry contact via telephone / Whatsapp message.

11 Kg LPG gas cylinders are commonly used for outdoor gas patio heaters. A patio heater is a

radiant heating appliance for generating thermal radiation for outdoor use with help of fuel-based methods like LPG gas. This equipment emits flame and heat that radiation that allows for a warm and cozy space in your restaurant setup or any outdoor event or party warmer during winter.

Over the past years, our company has supplied bulk quantity 11 kg LPG cylinders to all the leading 5 Star Hotels and prominent restaurants across Dubai for their outdoor heating equipment. Contact us for uninterrupted quality service at best rates in the market. We can arrange new cylinders/rental cylinders to facilitate winter season requirements.

Apart from trade license and other legal documents, we also have government sanctioned **ESMA certificate and Supreme Council of Energy** Approved Letter. The Supreme Council of Energy Approval Letter is the latest permit issued by the officials for all the gas distributing companies in Dubai.

OUR SERVICES

Propane Gas

Propane is commonly used for space and water heating, for cooking, and as fuel for engine applications such as forklifts, farm irrigation engines, fleet vehicles, and buses; however, its applications are rapidly growing due to new technology developments. When used as vehicle fuel, propane is known as propane autogas. It is also commonly used for Mosquito Magnetic machine. Propane Gas cylinder Sizes are available at 10kg and 44kg weights. These can be refilled/ purchased upon one day prior order.

Bulk Gas Supply

Obaid Gas LLC Company offers customers Bulk LP Gas at competitive pricing and with prompt service through a fleet of gas tankers. Suitable for residential, commercial and industrial use, bulk orders are handled by our experienced staff and delivered by an extended fleet of vehicles. All our goods are through authorized government suppliers. We can supply bulk gas by mutual agreement or on contract basis.

OUR SERVICES

Accessories

We associate with many leading brands in the industry and maintain a good stock of accessories including regulators, valves, detectors, pipe systems, etc.

➔ 0.5-2 bar Regulator

This compact switch on High Pressure LPG regulator is designed to supply LP Gas to appliances requiring a pressure between 0.5 to 2 bar. The regulator has an adjustable knob to obtain the desired pressure and flame. This has a capacity of 8 kg/hr.

➔ 30 mbar Regulator

This is a domestic pressure regulator designed to supply LP Gas to consuming appliances at a pressure of 30 mbar with capacity of 1 kg/hr and is the best fit to Gas cylinders equipped with automatic valves having diameter of 21 mm.

➔ 50 mbar Regulator

This is a domestic pressure regulator designed to supply LP Gas to appliances that require a pressure of 50 mbar with capacity of 1 kg/hr and is the best fit to Gas cylinders equipped with automatic valves having diameter of 21 mm.

➔ 90 mbar Regulator

This single stage, medium pressure compact quick-on regulator is designed to supply LPG to appliances that require a pressure of 90mbar with capacity of 1.5 kg/hr. This can be used with Gas cylinders equipped with automatic valves having diameter of 21 mm.

Safety Guide

If You Smell LPG or Detect Leaking Gas

If you Smell LPG

If inhaled, take the person to fresh air. Let him/her rest in a position comfortable for breathing. If necessary, artificial respiration may be given. Oxygen is administered if there is difficulty in breathing.

- 1- Close the knob of the LPG appliance properly. Bring the regulator to "OFF" position
- 2- Open all doors and windows so that fresh air can enter the room/ kitchen
- 3- Do not switch "ON" or "OFF" any electrical appliance in the room / kitchen
- 4- Putt off all flames. Do not use any

lighted matchbox or lighter to check for any LPG leakage.

- 5- Do not use electric fan to dispel LPG
- 6- If the smell of LPG still persists, remove the regulator from the cylinder and replace the safety cap on the valve. Move the cylinder without tilting to an open space away from naked flame or fire.
- 7- If you are not able to do so due to excessive leakage, evacuate the place and call the fire brigade.
- 8- In case of any assistance, Please contact your LPG supplier.

How Can a LPG Gas Leak Occur?

Gas leaks can occur from defective rubber tube, faulty regulator fitting and poor handling of gas appliances. Leaving the cooking unattended can cause the vessel to overflow, which in turn douses the burner and causes gas leak.

Precautions

Always store gas cylinders away from sunlight, heat, sparks and flame.

Avoid contact with skin and eyes.

Protect containers and the valves against physical damage.

LP gas cylinders must be stored in an upright position. The pressure relief valve should be in the vapour space of the cylinder.

Get the tubing checked by agents from the company which supplies you the gas cylinder once a year. They have professional equipment to detect leaks if any.

Replace tubes regularly

In Case of a Gas Leak:

A smallest spark or flame can ignite gas fumes and cause an explosion. When a gas leak is suspected, extinguish all flames, incense sticks, etc. Close the LPG regulator and put the safety cap on the cylinder. Don't light matches (or a lighter). Do not switch on/off any electrical switches or appliances. Open the doors and windows to ventilate your house. Call your gas supplier or the fire department. Isolate main electrical supply from the outside.

First Aid

If inhaled, take the person to fresh air. Let him/her rest in a position comfortable for breathing. If necessary, artificial respiration may be given. Oxygen is administered if there is difficulty in breathing.

If there has been skin contact with the gas, immediately remove the contaminated clothing. Rinse the affected skin with plenty of water for more than 20 minutes. Seek medical help.

In case of eye contact rinse the eye and the eyelid immediately with plenty of water for more than 20 minutes. Remove contact lenses, if any. Continue rinsing. Seek medical help.

The fire from gas explosion may be extinguished with carbon dioxide (CO₂), dry chemical powder or water spray. Using water jet and aiming water directly at point where gas is escaping is not recommended as the water may freeze. All personnel need to be evacuated to a safe area. Remove all flammable products from area of fire. Eliminate all sources of ignition if safe to do so.

General Questions

We believe in building long-term relationships with customers who are happy to be with us along with customer needs.

How do i order LPG cylinder refills or get a new connection from Obaid Gas?

Refer to our Distribution network to order cylinders anywhere in Dubai. For further concerns just give us a call at 052 654 6222 or Send "Hi" for WhatsApp messages and our person will deliver at your doorsteps within the deadline.

What is LPG?

LPG stands for Liquefied Petroleum Gas and is a petroleum product consisting of a mixture of flammable hydrocarbon gas, primarily propane and butane, produced either from a crude oil refining process or extracted from natural gas.

Gas - Safety Guide

Obaid Gas person will guide you with cylinder maintenances for upkeeps and our cylinders are fixed and investigated appropriately prior to deliverance.

Do you deliver in my area?

We have an extensive distribution network across Dubai. Refer to our "Distribution Network" section for further details. We are committed to delivering your order accurately, in good condition within the shortest time span.

How long does it take for a delivery of gas?

Please allow at least 15-30 minutes for delivery time depending on the area traffic situation. We are committed to deliver cylinders to our customers within the shortest time span
